

Tournament Recap- Lake Mac 5/20-5/21

The Lake Mac tournament is in the books and as always the lake lived up to its reputation and produced some incredible fish. The big fish of the tournament came in at 11.06lbs with an 11.05lb fish on its heels. The story of this weekend was the weather and the lack of small fish. The weather pre-fishing and for the tournament consisted of rain, wind, cold, snow, and more rain!!

There were several tactics that were producing some fish, but mostly large fish. Many of the 9+lb fish were coming from a deep break outside of Martins Bay in 40-50fow. Other large fish were coming from those using spinnerbaits shallow on the dam. There were some smaller keeper fish coming from the Van's area on live bait as well as the Castle trolling crankbaits.

Congrats to the winning team of Brian Canning and Mike Vorderstrasse and their winning weight of 39.93lbs!
